MOBILE INTERACTION DESIGN: INTERNSHIP

Re-imagine the mobile internet at Blackbuck Computing

Are you a student or recent graduate interested in the digital interaction design for mobile apps? Then talk to us about our internship and project work opportunities! Get real-world experience with the following.

- Designing interactions for a mobile app built for the iPhone and HTML5 web
- Designing visual themes, layouts and vector illustrations
- Communicating with users with well-crafted words and images

Blackbuck's mantra is to make the mobile internet more joyful. Our first product will make web browsing faster on your smartphone. Just download our app from an app store and turbocharge your iPhone or Android web speeds. You will be working on this product during this internship.

We love mentoring others, and have worked in the US and India in mobile product companies. Come join us for great learning experience and a supportive work environment.
